

Mechanical Engineer

POSITION SUMMARY

Conviron employs a global sales and distribution network with product placements in more than 90 countries worldwide. Our innovative design and manufacturing expertise has established Conviron as an industry leader on a global scale with products that are innovative, reliable, and robust.

RESPONSIBILITIES & DUTIES

As part of a team of professionals, your responsibilities will include:

- Translating project requirements into meaningful engineering specifications
- Estimating costs and schedules for various design and design activities
- Designing and developing cost effective, innovative product solutions
- Using Solidworks to create new and/or modify existing mechanical part/assembly models, drawings and bills of material
- Defining test protocols
- Performing verification and validation testing in accordance with our ISO quality system
- Collaborating with peers and contribute in design reviews
- Providing engineering support to cross-functional departments including QA, Production, Sales, Installation and Service
- Addressing non-conformances and responding to corrective actions in a timely fashion
- Implementing design changes through the Engineering Change Order (ECO) process
- Conducting troubleshooting and root cause analysis
- Preparing design documentation
- Other responsibilities and duties as assigned

REQUIRED SKILLS AND ABILITIES

- Clear written and oral communication skills
- A conscientious and details oriented individual
- Demonstrated analytical and troubleshooting skills
- Ability to work effectively on a team
- Developed time management and personal organizational skills
- Enjoys a fast paced environment

REQUIRED EDUCATION AND EXPERIENCE

- Mechanical Engineering degree from an EGM recognized post-secondary institution
- Candidate must be registered with EGM or be eligible for immediate registration as a P.Eng
- Minimum of 10 years of experience in the field of Engineering with at least 7 years in a design capacity

Since 1964, Conviron has been delivering controlled environment solutions to research facilities around the world. With clients that include many of the world's largest corporate and academic research institutions, our products are relied on where precise environmental control is essential.

- The following are considered assets:
 - Project leadership
 - Solidworks PDM, Solidworks Simulation
 - Experience in a manufacturing or test environment
 - Sheet metal or refrigeration or HVAC design
 - Design in accordance with recognized industry standards including but not limited to ASME, ANSI, NFPA, CSA, UL
 - Current/past contributing membership in SAE, ASHRAE, CASI, or CSME
 - Design in accordance with recognized industry standards including but not limited to ASME, ANSI, NFPA, CSA, UL

CURRENT/PAST CONTRIBUTING MEMBERSHIP IN SAE, ASHRAE, CASI, OR CSME POSITION DURATION

Permanent, full time position.
